DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group III, Figs. 12 and 13, in the reply filed on Sep 9, 2004 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 17-19 and 21-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Nilsson, U.S. Patent 3,643,521.

Nilsson shows, in Fig. 2, a feed screw device comprising:

a screw shaft 10;

a nut member 11 threadably engaging an outer peripheral surface of the screw shaft;

a lubricant supply device 17, at least a portion 18 of the lubricant supply device contacting the screw shaft;

a housing member 22 which is secured to the nut member and houses the lubricant supply device, the nut member being positioned outside of the housing member;

wherein the housing member/retaining ring, comprising a cylindrical portion 27 that extends away from the nut member and an end face (the vertical portion of 22) that covers an

axial end (the right side end) of the lubricant supply device, is disposed to project from an axial end surface of the nut member and along an outer circumferential surface of the lubricant supply device, the outer circumferential surface extending in a longitudinal direction of the screw shaft and beyond the end face of the nut member;

wherein the portion 18 of the lubricant supply device contacts a threaded groove of the screw shaft;

a means (screw) for securing the housing to the nut member; and

wherein the means for securing comprises a screw/fastener threaded to contact at least a portion of the nut member and into at least a portion of the housing.

4. Claims 19-21, 25, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Spontelli, U.S. Patent 2,818,745.

Spontelli shows, in Figs. 1 and 2, a feed screw device comprising;

a screw shaft 10;

a nut member 12 threadably engaging an outer peripheral surface of the screw shaft;

a lubricant supply device 25, at least a portion 29 of the lubricant supply device contacting the screw shaft;

a housing member 19 (not including 18) which is secured to the nut member and houses the lubricant supply device, the housing member including;

a cylindrical portion 38 that extends away from the nut member, and an end face (on the side of element 37) covers an axial end of the lubricant supply device;

wherein the end face covers the axial end away from the nut member;

Application/Control Number: 10/763,186 Page 4

Art Unit: 3682

wherein the portion of the lubricant supply device contacts a thread groove 11 of the screw shaft; and

a means/fastener 42 for securing/fixing the housing to the nut member.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chong H. Kim whose telephone number is (703) 305-0922. The examiner can normally be reached on Tuesday - Friday; 8:00 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Bucci can be reached on (703) 308-3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
